

Integrating AI In and Out of the Classroom

GENERAL INFORMATION

Trainer: Mr Hunter Niederhauser

Number of participants: 5-25 people
Language: English

Highlights:

This course provides educators with a comprehensive understanding of AI, its historical context, and its integration into education. Highlights included in-depth exploration of various AI generative tools, with a strong emphasis on hands-on experience in building and customizing AI applications, and practical strategies for AI integration in educational settings. Participants engaged in a final showcase the last day showing their ability to apply AI in education.

COURSE CONTENT

Description:

Participants dive into the historical evolution of AI, gain practical experience with various AI generative tools, and learn how to integrate AI responsibly and ethically into their teaching practices. With a strong focus on digital literacy and critical thinking. This course empowers educators to navigate the landscape of AI in education, equipping them with the skills and knowledge necessary to prepare their students for the future.

Aims and objectives:

The course emphasizes the importance of responsible AI usage through hands-on experience. Attendees will develop practical skills in building, customizing, and troubleshooting AI applications tailored for educational purposes, ensuring they are well-prepared to integrate AI into their teaching practices. The workshop also aims to promote digital literacy and critical thinking skills, both among educators and their students, thus preparing them for success in an increasingly AI-driven digital world. The course provides insights into the future of AI in education. It empowers educators to confidently embrace AI as a powerful tool for enhancing the learning experiences of their students.

Learning outcomes:

Participants will emerge from the course with a sense of responsibility, capable of navigating AI in an educational context, including the ability to identify and address privacy concerns and biases. Participants will have practical skills, enabling them to build, customize, and troubleshoot AI applications, making them proficient in the implementation of AI generative tools in the classroom. The course will equip educators with effective strategies integrating AI into their lesson plans, ultimately enhancing the learning experience for their students.

Target group:

Educators from kindergarten to university level in any subject who are interested in integrating AI into their classroom and lessons.

Required language level of the participants: English, B1/B2

Duration: 35 lessons, 7 days

Schedule*

SUNDAY	• Get to know each other with trainers and the other participants and location of the course, warm up
MONDAY	Introduction to AI and AI generative tools
TUESDAY	Teaching with AI and Responsible AI usage
WEDNESDAY	Practical AI Implementation and Best Practices for AI Integration
THURSDAY	AI in the Future of Education and English Learning Platforms
FRIDAY	Lesson Planning and Integration of AI
SATURDAY	• Capstone Projects and Final Presentations • Evaluation of the course, distributing certificates • Compulsory relationship building program

* Notes:

- the schedule describes likely activities but may be modified in accordance with the requests and needs of the participants;
- presentations of the participants' schools may be divided up and take place after the breaks on each day of the course.

ADDITIONAL INFORMATION

Certificates awarded:

Certificate of Attendance, Europass certificate and/or Learning agreement complement

Price: EUR including course, Erasmus+ documentation and a cultural activity
